Education

Pune Institute of Computer Technology   **July 2021 − May 2025**
Bachelor of Engineering: Computer Engineering   *CGPA: 7.53*

Experience

Backend Developer Intern - ZenStudy | *Next.js, JavaScript*   **December 2024**
- Building backend infrastructure for a video streaming platform with a focus on scalability and security.
- Implemented **Digital Rights Management (DRM)** solutions to protect video content and ensure secure streaming.
- Developing RESTful APIs and integrating backend services to support platform features and improve user experience.

Database/Backend Intern - Fluxvisio Tech | *Node.js, Express, Javascript*   **August 2024 - October 2024**
- Designed and implemented database schemas tailored for project needs to ensure optimal data structuring and retrieval.
- Utilized **Prisma ORM** for efficient database management, data modeling, and seamless interaction with various data sources.
- Developed and integrated **WebSockets** to enable real-time data communication and enhance user experience.

Freelance Developer - Arham Group | *Node.js, express, Flutter*   **June 2024 - July 2024**
- Developed an app to support the ProBook project, distributing affordable notebooks.To the needy indiviusals.
- Implemented user registration with Aadhar card verification and deployed the backend on render for multi-user access.
- Added features such as a tally button for daily sales calculations and an edit button to modify user orders.

Projects

CollabBoard | *Nodejs , Expressjs, Reactjs* | ⌾ | Live   **Nov 2024**
- Implemented **WebRTC**-based peer-to-peer communication using **simple-peer, STUN, and TURN** servers for low-latency, scalable, and reliable real-time interactions across network environments.
- Developed a real-time **collaborative whiteboard** platform with tools for drawing, enabling seamless teamwork.
- **Integrated chat and board management features**, enhancing usability and providing an all-in-one collaborative experience.

Events Judging App | *Flutter,NodeJs,PostgreSQL* | ⌾ | Demo   **Jan 2024**
- Engineered a mobile application for **instant judging and grading participants across multiple events**, ensuring accurate participant evaluations and reducing manual scoring errors by 25%, improving overall event quality.
- **MVVM** Architecture Implementation: Designed and implemented the application following the MVVM architecture, ensuring separation of concerns, maintainability, and ease of future enhancements.
- Deployed **PostgreSQL** databases to enhance data storage and retrieval, managing extensive participant records and event histories.

Technical Skills

Languages: Javascript, Typescript, C, C++, Python, Java, SQL
Databases: MongoDB, PostgreSQL, MySQL
Developer Tools: VS Code, Eclipse, Android Studio
Technologies/Frameworks & Libraries: Node.js, NextJs, Express.js,Google Firebase

Achievements

- **ACM ICPC:**Rank 65th in **Chennai Regionals**, after qualifying in the preliminary round by securing 1st rank in college.
- Qualified for **ACM ICPC Kanpur and Amritapuri Regionals** 2024.
- **Expert** (Rating :1711) on Codeforces (Amongst the top 1.7% on the website globally)
- **5* Rated** (2035) on Codechef (Amongst the top 1% on the website globally)
- **Google KickStart** : Secured a Rank of 730/8100+ in 2022 Round G.
- Achieved ranks of **325**, **726**, **946** in multiple Codeforces rounds and global ranks of **1**, **11**, **60** in different Codechef rounds.

Leadership / Extracurricular

PICT Codechef Chapter   **Present**
President
- Led the CodeChef chapter club for a year, organizing regular contests and managing all club activities.

PICT ACM Chapter   **Present**
Domain Director - Competitive Programming
- Successfully organized and authored CodeLicious contest, attracting over 2000 participants including international attendees.
- Led post-contest discussion sessions for junior members.
